APPENDIX A - Constructed Measures and Definitions

This technical appendix describes any statistical measure used to calculate a particular contextual variable that deviates from standard convention, involves a computationally complex formula, or that otherwise requires additional clarification. It also defines Census terms that users may not have previously encountered. Each entry is listed in alphabetical order.

At Risk Children

At risk pre-school children are defined as children four-to-five years old who are “living with mother who is not a high school graduate, is divorced or separated, and is below the 1989 poverty level.” At risk school age children are defined as “children six to 19 years of age, who are not high school graduates, living with mother who is not a high school graduate, is single, divorced or separated, and is below the 1989 poverty level.”¹

Birth Rate

To calculate county-level birth rates, a three-year birth average was used in the numerator, and the midperiod population was used in the denominator. For example, the 1990 age-specific birth rate for women aged 15-19 was calculated as follows:

$$\frac{(1989 \text{ births to women 15-19} + 1990 \text{ births to women 15-19} + 1991 \text{ births to women 15-19})/3 \times 1,000}{\text{Number of women aged 15-19 in 1990}}$$

Child/Woman Ratio

Age-specific child/woman ratios are calculated by dividing the number of children ever born (not counting still births) to women in the specified age group by the midyear population of women in that age group.

Death Rate

To calculate county-level death rates, a three-year death average was used in the numerator, and the midperiod population was used in the denominator. For example, the crude death rate for 1990 was calculated as follows:

$$\frac{(\text{Deaths in 1989} + \text{Deaths in 1990} + \text{Deaths in 1991})/3 \times 1,000}{\text{Total population in 1990}}$$

Dispersion

The dispersion measures are based on the following formula:

$$D = \frac{k(N^2 - \sum f_i^2)}{N^2(k-1)}$$

where k is the number of categories, N^2 is the sum of all categories squared, and $\sum f_i^2$ is the sum of squared category frequencies over all i (=1, ..., k) groups. If D = 0, then only one category is nonzero; if D = 1, all category frequencies are equal.

Female Labor Force Opportunity Index

This measure indicates the expected number of jobs for female workers relative to the potential supply of female workers, taking into account the sex-segregated nature of the labor market. Following Nakamura et al. (1979), it is defined as $\hat{O}p_iw_i/F$ where the expected number of jobs for women in a county is expressed as w_i , the number of workers in the county who are in the three-digit census occupation category i , weighted by p_i , the national proportion of workers in occupation category i who are female, summed over all occupations; and F is the potential supply of women workers, expressed as the number of women in the county aged 16 and older.²

Infant Death Rate

To calculate county-level infant death rates, a three-year infant (< 1 year) death average was used in the numerator, and the midperiod population of persons less than one year old was used in the denominator. For example, the total infant death rate for 1990 was calculated as follows:

$$\frac{(\text{Infant Deaths in 1989} + \text{Infant Deaths in 1990} + \text{Infant Deaths in 1991})/3 \times 1,000}{\text{Persons Less than 1 Year Old in 1990}}$$

Infant Mortality Rate

Due to possible fluctuation of infant births throughout a year or in a previous year, a three-year annual average infant mortality rate was calculated. This measure was obtained by dividing the sum of infant (less than one year old) deaths in three sequential years by the number of births in the same three sequential years, and multiplying the result by 1,000.

Insured Unemployment Rate

This rate captures the volume of weekly unemployment insurance claims relative to insured employment. More specifically, it is the average number of claims per week in the state divided by the average monthly employment covered by the state during four of the last six completed quarters.

Linguistic Isolation

The Bureau of the Census defines “linguistic isolation” as a household “in which no person age 14 years or over speaks only English and no person age 14 years or over who speaks a language other than English speaks English ‘Very well.’ All the members of a linguistically isolated household are tabulated as linguistically isolated, including members under age 14 years who may speak only English” (p. B-26).³

Low Birth Weight Births as a Proportion of All Births

To calculate measures of low birth weight births as a proportion of all births, a three-year low birth weight (< 2500 grams) birth average was used in the numerator, and the midperiod total number of births was used in the denominator. For example, low weight births as a proportion of all births for 1990 was calculated as follows:

$$\frac{(\text{Low Birth Wgt Births in 1989} + \text{Low Birth Wgt Births in 1990} + \text{Low Birth Wgt Births in 1991})/3 \times 1,000}{\text{All Births in 1990}}$$

Medians

Median values for grouped data were calculated using Pareto interpolation for income measures and linear interpolation for all other measures. The formula for the median is as follows:

$$M_{lb} + [p*(M_{ub} - M_{lb})]$$

where M_{ub} is the upper bound of the category containing the median, M_{lb} is the lower bound of this category, and p is the proportion of the population bounded by M_{ub} and M_{lb} that lies at or below the median. In Pareto interpolation, the median is derived by interpolating between the logarithms of the of M_{ub} and M_{lb} .

If the median falls in the final open-ended interval of any distribution, the median is equated to the lower limit of this category plus one. For household income by race and Hispanic origin, this value is 100,001; for gross rent, this value is 1,001; for monthly owner cost by race and Hispanic origin, this value is 1,501 and 401 for owners with and without mortgage, respectively. If the median falls in the lowest interval of any distribution, the median is equated to the upper bound of the category minus one. For household income by race and Hispanic origin, this value is 4,999; for gross rent, this value is 199; for monthly owner cost by race and Hispanic origin, this value is 299 and 99 for owners with and without mortgage, respectively. This procedure is consistent with that used to calculate median measures in the U.S. Bureau of Census, Summary Tape File 3A.³

Mobility Limitation

As defined by the Bureau of the Census, a person has a “mobility limitation” if he or she “had a health condition that had lasted for six or more months and which made it difficult to go outside the home alone. Examples of outside activities on the questionnaire included shopping and visiting the doctor’s office. The term ‘health condition’ referred to both physical and mental conditions. A temporary health problem, such as a broken bone that was expected to heal normally, was not considered a health condition” (p. B-27).³

Self-Care Limitation

The Bureau of the Census defines a person as having a “self-care limitation” if he or she “had a health condition that had lasted for six or more months and which made it difficult to take care of their own personal needs, such as dressing, bathing, or getting around inside the home... The term ‘health condition’ referred to both physical and mental conditions. A temporary health problem, such as a broken bone that was expected to heal normally, was not considered a health condition” (p. B-35).³

Standard Deviation

The standard deviation for grouped data is a function of category frequencies and their respective midpoints. The following formula was used to calculate standard deviations:

$$\sqrt{\frac{\sum f_i X_i^2 - (\sum f_i X_i)^2 / N}{N}}$$

where f_i is the frequency of category i , X_i is the category midpoint, and N is the sum of all category frequencies. When final category endpoints were left open-ended, Pareto interpolation was used to estimate the midpoint of the final category.

Subfamily

As defined by the Bureau of the Census, a subfamily is “a married couple (husband and wife enumerated as members of the same household) with or without never-married children under 18

years old, or one parent with one or more never-married children under 18 years old, living in a household and related to, but not including, either the householder or the householder's spouse. The number of subfamilies is not included in the count of families, since subfamily members are counted as part of the householder's family" (p. B-15).³

Total Fertility Rate

The total fertility rate, as measured in this data set, is the implied number of children that a cohort of 1,000 women would have by age 44 if they were subject to the age-specific birth rates prevailing in the population for which the rate is calculated. It is calculated as the sum of the age-specific birth rates, per 1,000 women.

Women in Need of Family Planning Services

Women included in this category, as defined by Frost (1996),⁴ are those who are at risk of unintended pregnancy (fecund, sexually active, and not pregnant or trying to become pregnant) and who are either under age 20 or are aged 20-44 with a total family income that is less than 250% of the federal poverty level. In calculations using women in need of family planning services, it should be noted that family planning data were collected in 1994, while women in need of family planning services data are for 1990.

APPENDIX B - Source Notes and Source Variable Documentation

This appendix contains information about each data source used to construct variables contained in the Add Health Contextual Database. The appendix is ordered alphabetically by source code (see Variable Naming Conventions in the INTRODUCTION). Essential notes are presented along with a complete list of accessed original variables for users desiring more detailed information about the constructed variables and their source. Note that original variables are NOT included in the Contextual Database.

For each source, data file descriptions and user notes are followed by a table of source variables. This table consists of the Add Health Contextual Database variable name, source variable name if one exists, and variable descriptions. Each of these is described below.

Variable Name:

Variables obtained from source files were renamed for ease of use and readability. Variables required for the constructed measures were subset, and then numbered sequentially. In some cases, data obtained in raw form were combined to create desired measures. These cases will be listed in the user notes. The variable number is preceded by two to four letters characterizing the source data set. The first two characters of the variable name are always the same as the source code.

Source Name:

The source name is the variable name as it was provided in the source data file. Users who have access to original source data can use this information to identify each variable in their files. When data were obtained from tables, or read in from ASCII files, the source name column is shown to be not available (N/A).

Description:

A complete description of each source variable is listed. The description can be used to clarify contextual variable meanings when the user is unsure of the definition of a derived measure. For this purpose, formulas in the DATA DICTIONARY reference the original variables by the Variable Name in these tables.

AG - Alan Guttmacher Institute Files

Four data files were obtained from the Alan Guttmacher Institute: (1) a Census of Population and Housing special tabulation file; (2) an abortion provider file; (3) a file containing data on family planning services; and (4) a file containing data estimating women at risk for unintended pregnancy. Each data set was provided in ASCII or EBCDIC form and thus no source variable names exist. The contents of each data file are described individually below.

(1) Special tabulations of the 1990 Decennial Census containing county level population data by sex, by race, by age, by marital status and by poverty level were obtained by AGI from the Bureau of the Census. Values were summed over smaller categories to obtain the measures listed below.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
AGI1	N/A	White men aged 15-17, married with spouse present, 1990
AGI2	N/A	White men aged 18-19, married with spouse present, 1990
AGI3	N/A	White men aged 15-19, married with spouse present, 1990

AGI56	N/A	White women aged 18-19, not married with spouse present, 1990
AGI57	N/A	White women aged 15-19, not married with spouse present, 1990
AGI58	N/A	White women aged 20-24, not married with spouse present, 1990
AGI59	N/A	White women aged 25-34, not married with spouse present, 1990
AGI60	N/A	White women aged 35-44, not married with spouse present, 1990
AGI61	N/A	Black women aged 15-17, married with spouse present, 1990
AGI62	N/A	Black women aged 18-19, married with spouse present, 1990
AGI63	N/A	Black women aged 15-19, married with spouse present, 1990
AGI64	N/A	Black women aged 20-24, married with spouse present, 1990
AGI65	N/A	Black women aged 25-34, married with spouse present, 1990
AGI66	N/A	Black women aged 35-44, married with spouse present, 1990
AGI67	N/A	Black women aged 15-17, not married with spouse present, 1990
AGI68	N/A	Black women aged 18-19, not married with spouse present, 1990
AGI69	N/A	Black women aged 15-19, not married with spouse present, 1990
AGI70	N/A	Black women aged 20-24, not married with spouse present, 1990
AGI71	N/A	Black women aged 25-34, not married with spouse present, 1990
AGI72	N/A	Black women aged 35-44, not married with spouse present, 1990
AGI73	N/A	Other women aged 15-17, married with spouse present, 1990
AGI74	N/A	Other women aged 18-19, married with spouse present, 1990
AGI75	N/A	Other women aged 15-19, married with spouse present, 1990
AGI76	N/A	Other women aged 20-24, married with spouse present, 1990
AGI77	N/A	Other women aged 25-34, married with spouse present, 1990
AGI78	N/A	Other women aged 35-44, married with spouse present, 1990
AGI79	N/A	Other women aged 15-17, not married with spouse present, 1990
AGI80	N/A	Other women aged 18-19, not married with spouse present, 1990
AGI81	N/A	Other women aged 15-19, not married with spouse present, 1990
AGI82	N/A	Other women aged 20-24, not married with spouse present, 1990
AGI83	N/A	Other women aged 25-34, not married with spouse present, 1990
AGI84	N/A	Other women aged 35-44, not married with spouse present, 1990
AGI85	N/A	Hispanic women aged 15-17, married with spouse present, 1990
AGI86	N/A	Hispanic women aged 18-19, married with spouse present, 1990
AGI87	N/A	Hispanic women aged 15-19, married with spouse present, 1990
AGI88	N/A	Hispanic women aged 20-24, married with spouse present, 1990
AGI89	N/A	Hispanic women aged 25-34, married with spouse present, 1990

Variable Name:	Source Name:	Description:
AGI90	N/A	Hispanic women aged 35-44, married with spouse present, 1990
AGI91	N/A	Hispanic women aged 15-17, not married with spouse present, 1990
AGI92	N/A	Hispanic women aged 18-19, not married with spouse present, 1990
AGI93	N/A	Hispanic women aged 15-19, not married with spouse present, 1990
AGI94	N/A	Hispanic women aged 20-24, not married with spouse present, 1990
AGI95	N/A	Hispanic women aged 25-34, not married with spouse present, 1990
AGI96	N/A	Hispanic women aged 35-44, not married with spouse present, 1990

(2) Abortion data are based on a survey conducted by AGI of 3,156 abortion providers. These include hospitals, clinics and physicians' offices providing abortions in 1992. Eight percent of the total number of abortions were projected from previous survey years and 3% were obtained from knowledgeable community sources.¹ Abortion counts are based on the location of abortion facilities, and do not necessarily reflect the number of abortions obtained by residents of a county.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
AGI97	N/A	Number of abortions in the county in 1992
AGI98	N/A	Largest number of abortions performed in any hospital in the county in 1992 0 = no provider of this type 1 = 1-4 abortions 2 = 5-24 abortions 3 = 25-399 abortions 4 = 400 or more abortions
AGI99	N/A	Largest number of abortions performed in any abortion clinic in the county in 1992 [Coded 0-4 same as above]
AGI100	N/A	Largest number of abortions performed in any other non hospital provider in the county in 1992 [Coded 0-4 same as above]

(3) Family planning data collected by AGI in 1994 are based on information provided by 3,119 family planning agencies responsible for operating 7,122 clinics in the U.S. Data were obtained from 88% percent of these clinics; the remaining data were imputed by AGI. A family planning clinic is defined as a site where contraceptive counseling, education and services are provided to the general public and where services provided to at least some clients are free, are offered at a reduced fee, or are publicly subsidized. Private physician's offices, health care centers operated by HMOs, educational institution health centers and veteran or military health facilities were excluded from the definition.

Family planning clients include women who received contraceptive services from family planning clinics in 1994, who made at least one initial or follow-up visit to a clinic during a twelve month reporting period. This population also includes all active contraceptive clients for whom a chart was maintained, including those who made contraceptive supply visits, those who received a method prescription but deferred their initial medical exam, and those who were using rhythm or natural family planning. It does not include women who received only abortion services, pregnancy tests or infertility services, or who were referred to another provider for method prescription or provision.² Women who received only counseling and were referred elsewhere for prescription or provisions were excluded from this definition.

¹ Henshaw, Stanley K. and Jennifer Van Vort (1994), "Abortion Services in the United States, 1991 and 1992," *Family Planning Perspectives*, Vol. 26, pp. 100-106.

² For a more complete discussion, see: Frost, Jennifer (1996), "Family Planning Clinic Services in the United States, 1994," *Family Planning Perspectives*, Vol. 28, No. 3, pp. 93-94.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
AGI101	N/A	Number of family planning clinic sites in the county in 1994
AGI102	N/A	Number of family planning clients served in 1994
AGI103	N/A	Number of family planning clients less than 20 years of age served in 1994

(4) Data on women at risk of unintended pregnancy were obtained from the County File of Women at Risk of an Unintended Pregnancy, 1990, compiled by AGI. Women at risk of an unintended pregnancy are defined as women who are sexually active, fecund and are not pregnant or trying to become pregnant during the year.³ Sterilized women and women with sterilized partners are not included. This information is provided by race, age, marital status, and poverty status, as defined by the U.S. Bureau of the Census. Values were summed over smaller categories to obtain the measures listed below.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
AGI104	N/A	Women aged 15-19 at risk of unintended pregnancy, 1990
AGI105	N/A	Women aged 20-44 at risk of unintended pregnancy with total family income <250% above poverty level, 1990

Additional information about these four data files can be obtained by contacting the Alan Guttmacher Institute, 111 Fifth Avenue New York, NY 10003.

³ Frost, Jennifer (1996), "Family Planning Clinic Services in the United States, 1994," *Family Planning Perspectives*, Vol. 28, No. 3, p. 97.

AR - Area Resource File, 1995

The Area Resource File (ARF) System was developed and is maintained by the Office of Data Analysis and Management (ODAM) of the Bureau of Health Professions (BHP), Health Resources and Services Administration (HRSA). The Basic ARF County file contains a compilation of county level health and health maintenance data from over 75 different source files, representing seven primary specialty areas: (1) health professions; (2) health facilities; (3) health utilization; (4) health expenditures; (5) population characteristics and economic data; (6) environment; and (7) health professions training. The ARF is maintained and expanded on a continuing basis. The February 1995 version of the file includes over 7,000 county level variables. It is available on magnetic tape with extracts on diskette from Quality Resource Systems, Inc., 11204 Waples Mill Road, Fairfax, VA 22030.⁴

Variables from the ARF used for constructing measures included in the Add Health Contextual Database are: (1) natality and mortality measures collected by the National Center for Health Statistics; (2) physician counts obtained from the American Medical Association Physician Master File Tape, the American Osteopathic Association, and the Census of Population 1990: Equal Opportunity Special File; (3) hospital data from the American Hospital Association's Annual Survey; and (4) Competitive Edge HMO data published by Interstudy.

It should be noted that Alaska was treated as one county in the Area Resource File, 1995. Thus, state level measures were allocated to all counties within Alaska that are represented in the Add Health Contextual Database. Similarly, several independent cities were grouped with their original counties, one or several of which may be represented in the Add Health Contextual Database. These include:

Columbus, Georgia	with Muscogee County
Kalawao County, Hawaii	with Maui County
Bedford, Virginia	with Bedford County
Bristol, Virginia	with Washington County
Buena Vista, Virginia	with Rockbridge County
Charlottesville, Virginia	with Albemarle County
Clifton Forge, Virginia	with Alleghany County
Colonial Heights, Virginia	with Chesterfield County
Covington, Virginia	with Alleghany County
Danville, Virginia	with Pittsylvania County
Emporia, Virginia	with Greensville County
Fairfax, Virginia	with Fairfax County
Falls Church, Virginia	with Fairfax County
Franklin, Virginia	with Southampton County
Fredericksburg, Virginia	with Spotsylvania County
Galax, Virginia	with Grayson County
Harrisonburg, Virginia	with Rockingham County
Hopewell, Virginia	with Prince George County
Lexington, Virginia	with Rockbridge County
Lynchburg, Virginia	with Campbell County
Manassas, Virginia	with Prince William County
Manassas Park, Virginia	with Prince William County
Martinsville, Virginia	with Henry County
Norfolk, Virginia	with Norfolk County
Norton, Virginia	with Wise County
Petersburg, Virginia	with Dinwiddie County

⁴ We wish to thank James Peterson and colleagues at Sociometrics Corporation, Los Altos, CA, for allowing us to use excerpts from their description of this data source.

Poquoson, Virginia	with York County
Portsmouth, Virginia	with Norfolk County
Radford, Virginia	with Montgomery County
Richmond, Virginia	with Henrico County
Roanoke, Virginia	with Roanoke County
Salem , Virginia	with Roanoke County
South Boston, Virginia	with Halifax County
Staunton, Virginia	with Augusta County
Suffolk, Virginia	with Suffolk City County
Waynesboro, Virginia	with Augusta County
Williamsburg, Virginia	with James City County
Winchester, Virginia	with Frederick County

Physician data are available for total patient care as well as office-based only physicians. "Total patient care" includes office-based physicians, hospital residents, hospital full-time staff, and clinical fellows. Short term general hospitals are those that provide non-specialized care and whose patients generally stay at the hospital for less than 30 days. HMO membership is calculated in the county of the HMO facility, and does not reflect the HMO membership of the county.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
ARF1	F11986-89	White male births, 1989-1991 three year average
ARF2	F11987-89	White female births, 1989-1991 three year average
ARF3	F11988-89	Black male births, 1989-1991 three year average
ARF4	F11989-89	Black female births, 1989-1991 three year average
ARF5	F11990-89	Other male births, 1989-1991 three year average
ARF6	F11991-89	Other female births, 1989-1991 three year average
ARF7	F11941-89	Total deaths, 1989-1991 three year average
ARF8	F11942-89	White male deaths, 1989-1991 three year average
ARF9	F11943-89	Black male deaths, 1989-1991 three year average
ARF10	F11944-89	Other male deaths, 1989-1991 three year average
ARF11	F11945-89	White female deaths, 1989-1991 three year average
ARF12	F11946-89	Black female deaths, 1989-1991 three year average
ARF13	F11947-89	Other female deaths, 1989-1991 three year average
ARF14	F11924-89	White male infant deaths, 1989-1991 three year average
ARF15	F11925-89	White female infant deaths, 1989-1991 three year average
ARF16	F11926-89	Black male infant deaths, 1989-1991 three year average
ARF17	F11927-89	Black female infant deaths, 1989-1991 three year average
ARF18	F11928-89	Other male infant deaths, 1989-1991 three year average
ARF19	F11929-89	Other female infant deaths, 1989-1991 three year average
ARF20	F11930-89	AIDS deaths, 1989-1991 three year average
ARF21	F11215-93	Total physicians (non-federal) providing patient care, 1993
ARF22	F11215-90	Total physicians (non-federal) providing patient care, 1990
ARF23	F04603-93	Office-based physicians (non-federal) providing patient care, 1993
ARF24	F04603-90	Office-based physicians (non-federal) providing patient care, 1990
ARF25	F11069-93	General and family practice physicians (non-federal) providing patient care, 1993
ARF26	F11069-90	General and family practice physicians (non-federal) providing patient care, 1990

CD - Centers for Disease Control STD Files

Cases of Sexually Transmitted Diseases (STDs) are reported to the Division of STD Prevention, Centers for Disease Control (CDC) by STD control programs and health departments.⁵

(1) State level STD data were obtained from Tables 3-5 (chlamydia), Tables 11-13 (gonorrhea), and Table 23 (syphilis) in the 1995 STD Surveillance Report published by the Centers for Disease Control in September 1996. Data for District of Columbia were obtained from Tables 6-8 (chlamydia), Tables 15-17 (gonorrhea) and Tables 27-29 (syphilis).

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
CDC1	N/A	State level chlamydia rate per 100,000 population, 1995
CDC2	N/A	State level chlamydia rate per 100,000 population, 1993
CDC3	N/A	State level chlamydia rate per 100,000 population, 1991
CDC4	N/A	State level male chlamydia rate per 100,000 male population, 1995
CDC5	N/A	State level male chlamydia rate per 100,000 male population, 1993
CDC6	N/A	State level male chlamydia rate per 100,000 male population, 1991
CDC7	N/A	State level female chlamydia rate per 100,000 female population, 1995
CDC8	N/A	State level female chlamydia rate per 100,000 female population, 1993
CDC9	N/A	State level female chlamydia rate per 100,000 female population, 1991
CDC10	N/A	State level gonorrhea rate per 100,000 population, 1995
CDC11	N/A	State level gonorrhea rate per 100,000 population, 1993
CDC12	N/A	State level gonorrhea rate per 100,000 population, 1991
CDC13	N/A	State level male gonorrhea rate per 100,000 male population, 1995
CDC14	N/A	State level male gonorrhea rate per 100,000 male population, 1993
CDC15	N/A	State level male gonorrhea rate per 100,000 male population, 1991
CDC16	N/A	State level female gonorrhea rate per 100,000 female population, 1995
CDC17	N/A	State level female gonorrhea rate per 100,000 female population, 1993
CDC18	N/A	State level female gonorrhea rate per 100,000 female population, 1991
CDC19	N/A	State level syphilis rate (primary and secondary stages) per 100,000 population, 1995
CDC20	N/A	State level syphilis rate (primary and secondary stages) per 100,000 population, 1993
CDC21	N/A	State level syphilis rate (primary and secondary stages) per 100,000 population, 1991

(2) County level syphilis data and county population estimates were received from the Centers for Disease Control in September 1996. The CDC provides Alaskan syphilis data by regions instead of counties. Contextual data for Alaska were taken from state level measures of syphilis rates found in Table 23. These were allocated to each county in Alaska in the Add Health Contextual Data Base.

⁵ For detailed information about data sources and limitations, see Appendix of 1995 STD Surveillance Report published by the CDC in September, 1996.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
CDC22	N/A	County level reported syphilis cases (primary and secondary stages), 1995
CDC23	N/A	County level reported syphilis cases (primary and secondary stages), 1993
CDC24	N/A	County level reported syphilis cases (primary and secondary stages), 1990
CDC25	N/A	County population estimate, 1995
CDC26	N/A	County population estimate, 1993

CM - Churches and Church Membership, 1990

Churches and Church Membership (CM) data, containing estimates of the number of churches, members, and adherents⁶ to denominations by county, were collected by the offices of the Church Growth Research Center at the Church of the Nazarene Headquarters in Kansas City, Missouri. The data collection was sponsored by the Association of Statisticians of American Religious Bodies (ASARB) and compiled in data form by The Roper Center for Public Opinion Research. The Glenmary Research Center has published a final report for the 1990 data.

Of 246 Judaeo-Christian church bodies that were found in the *Yearbook of American and Canadian Churches* and were invited to participate, 133 are represented in the CM data file. It is estimated that over 90% of all Judaeo-Christian religious membership totals submitted to the *Yearbook of American and Canadian Churches* are included in the CM file. Denominations were asked to compile member and adherent data, by county, for the U.S. In many cases, the Church Growth Research Center staff estimated the number of adherents using data provided by the denomination. Such statistics were then reviewed by church staff. The Jewish estimate was compiled using data from approximately 200 Jewish Federations, as well as from synagogues found in the 1987-88 *Jewish Almanac--Yellow Pages*. To calculate a Black Baptist estimate, 1,489 Black Baptist churches were sampled in a two-year data gathering effort, from which estimates were made for all counties based on the distribution of black populations within metropolitan and non-metropolitan areas.

Adherency in each county reflects the number of adherents to churches located within the county, not the number of adherents residing in the county. Thus, measures of adherency per capita may exceed 1.

Several religious groups were provided both in combined form and by affiliation. This was the case for the Friends denominations and the Catholic Church. Only the grouped forms of the measures were used as source variables in the Add Health Contextual Database. The 'Friend - All Affiliations' (CM99) category includes the following affiliations: Conservative (Wilburite) Friend; Evangelical Friends International; Friends General Conference; Friends General Conference & Friends United; Friends United Meeting; Friends Independent; and Friends Independent Evangelical. The 'Catholic Church - All Rites' (CM105) category includes the following rites: Armenian Rite; Byzantine Ruthenian Rite; Chaldean Rite; Latin Rite; Maronite Rite; Melkite-Greek Rite; Romanian Byzantine Rite; and Ukrainian Byzantine Rite.

Denominations were categorized as liberal, moderate and conservative with the assistance of Dr. Rodney Stark, a noted scholar of the sociology of religion at the University of Washington. The Congregational Christian Churches (not part of any CCC body) and The Protestant Conference (Lutheran) were excluded from this categorization. Catholic and Jewish adherents have been provided as separate categories, but are also included in the moderate and liberal groups, respectively, in the three variable categorization of religious adherency. Black Baptist adherents are excluded from the three variable liberal, moderate and conservative categorization.

A number of cities have been combined into their nearby counties in the CM data set (e.g., the independent city of Bristol, Va, is added into Washington County). One or several of these counties may be represented in the Add Health Contextual Database. In these cases, the grouped county measure was used as a proxy for the independent city. These types of counties include:

Alexandria, Virginia	with Arlington County
Bedford, Virginia	with Bedford County
Bristol, Virginia	with Washington County
Buena Vista, Virginia	with Rockbridge County
Charlottesville, Virginia	with Albemarle County

⁶Adherents include all church members and other regular participants who are not considered communicants, confirmed, or full church members.

Chesapeake, Virginia		with Norfolk County
Clifton Forge, Virginia	with Alleghany County	
Colonial Heights, Virginia		with Dinwiddie County
Covington, Virginia		with Alleghany County
Danville, Virginia		with Pittsylvania County
Emporia, Virginia		with Greensville County
Fairfax, Virginia	with Fairfax County	
Falls Church, Virginia		with Fairfax County
Franklin, Virginia		with Southampton County
Fredericksburg, Virginia	with Spotsylvania County	
Galax, Virginia	with Carrol County	
Harrisonburg, Virginia	with Rockingham County	
Hopewell, Virginia		with Prince George County
Lexington, Virginia		with Rockbridge County
Lynchburg, Virginia		with Campbell County
Manassas, Virginia		with Prince William County
Manassas Park, Virginia	with Prince William County	
Martinsville, Virginia		with Henry County
Norton , Virginia		with Wise County
Petersburg, Virginia		with Dinwiddie County
Poquoson, Virginia		with York County
Portsmouth, Virginia		with Norfolk County
Radford, Virginia		with Montgomery County
Richmond, Virginia		with Henrico County
Roanoke, Virginia		with Roanoke County
Salem , Virginia	with Roanoke County	
South Boston, Virginia	with Halifax County	
Staunton, Virginia		with Augusta County
Waynesboro, Virginia		with Augusta County
Williamsburg, Virginia	with James City County	
Winchester, Virginia		with Frederick County

The CM data file can be obtained from The Roper Center for Public Opinion Research, P.O. Box 440, Storrs, CT 06268-0440.

CT - Centers for Disease Control State Tobacco Control Highlights

State and national tobacco use and prevention data are compiled by the Office on Smoking and Health, National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), CDC. These data are available at the NCCDPHP Tobacco Information and Prevention Source Internet site at: <http://www.cdc.gov/nccdphp/osh/statehi/statdata.htm>. The data used in the Add Health Contextual Database were obtained from this site in June 1997. An earlier version of these data can be obtained in printed form from the CDC, as Publication No. 099-4895, State & National Tobacco Control Highlights.

State tobacco control data originated from several sources. The Smoking Among Adults Aged 18 and Older measure was obtained from the Behavioral Risk Factor Surveillance System (BRFSS) for 1992 and 1993. Arkansas data are from the BRFSS for 1993 only. Wyoming data are from the Current Population Survey (CPS) for 1992-1993. "The BRFSS defines current smokers as those people who reported ever smoking at least 100 cigarettes and who currently smoked. Irregular smokers (current smokers who volunteered that they do not smoke regularly when asked to report the average number of cigarettes they smoked each day) were included in the BRFSS estimates. The CPS defined current smokers as those who reported ever smoking at least 100 cigarettes and who currently smoked every day or on some days."⁷

The smokeless tobacco use measure originated from data obtained from the 1992-1993 CPS. "Current users of smokeless tobacco are defined as those who reported ever using chewing tobacco or snuff on a regular basis and currently used either substance."¹

The death rate variable was estimated "using the Smoking-Attributable Mortality, Morbidity, and Economic Costs (SAMMEC) software package (version 2.1). SAMMEC estimates the number of smoking-related deaths from neoplastic, cardiovascular, and respiratory conditions and diseases of infants by using attributable risk formulas based on smoking prevalence and relative risks for certain conditions among current and former smokers (compared to never smokers)."¹

Cigarette tax data are from the CDC State Tobacco Activities Tracking and Evaluation (STATE) System which tracks enacted state legislation. These data reflect legislation active as of December 1, 1995.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
CT1	N/A	Percent of population 18 and older smoking, 1992-1993
CT2	N/A	Percent of population 18 and older using smokeless tobacco, 1992-1993
CT3	N/A	Death rate due to smoking per 100,000 population, 1990
CT4	N/A	State tax, in cents, per cigarette pack, 1995

CU - U.S.A. Counties, 1994

USA Counties contains information on demographic, economic, and governmental data for the purpose of multi-county comparisons or single county profiles. It is a secondary data set compiled by extracting data from such primary sources as the State and Metropolitan Area Data Book and the County and City Data Book. These data were collected from several Federal agencies and national associations, such as the Bureau of Economic Analysis, the Bureau of Labor Statistics, the Federal Bureau of Investigation, the Social Security Administration, and several private organizations, such as the American Medical Association and the Elections Research Center. More than 2,500 data items are available for the nation, its 3,141 counties or county equivalents, 50 states and the District of Columbia.

USA Counties is available on CD-ROM as a collection of 35 dBASE-III files from the U.S. Bureau of the Census, Customer Services, Data User Services Division, Washington, DC 20233.

Among the information available from USA Counties are data pertaining to local government direct general expenditures for 1987. General expenditures are defined as all expenditures except those classified as utility, insurance or liquor store expenditures. Direct general expenditures are those that are non-intergovernmental. As excerpted directly from the USA Counties documentation⁸, following are definitions of each expenditure type:

Education Expenditure: “provision or support of schools and other educational facilities and services, including those for educational institutions beyond the high school level operated by local governments. They cover such related services as pupil transportation, school milk and lunch programs and other cafeterias, health and recreational programs, and the like.”

Health and Hospital Expenditure: “out-patient health services including public health administration, research and education, treatment and immunization clinics, nursing, etc.; financing, construction, and operation of nursing homes; financing, construction, acquisition, maintenance, or operation of hospital facilities; provision of hospital care; and support of public or private hospitals.”

Public Welfare Expenditure: “support of and assistance to needy persons contingent upon their needs. Included are Cash Assistance paid directly to needy persons under categorical (Old Age Assistance, Aid to Families with Dependent Children, Aid to the Blind, and Aid to the Disabled) and other welfare programs; vendor payments made directly to private purveyors for medical care, burials, and other commodities and services provided under welfare programs; welfare institutions; and any other direct general expenditure for welfare purposes. Pensions to former employees and other benefits not contingent on need are excluded.”

Police Protection Expenditure: “preservation of law and order and traffic safety. It includes police patrols and communications, crime prevention activities, detention and custody of persons awaiting trial, traffic safety, and vehicular inspection.”

It should be noted that in several instances, local government expenditures were collected for groups of counties. In these cases, the group level measure was allocated to each relevant county. The following counties, one of several of which may be represented in the Add Health Contextual Database, were affected by this procedure: Aleutians East and Aleutians West Counties in Alaska were grouped together; Dillingham County was grouped with Lake and Peninsula County in Alaska; and Bronx, Kings, New York, Queens, and Richmond Counties in NY were grouped together.

DL - Department of Labor ETA Form Files

Files containing ETA Form data were obtained from the Employment and Training Administration (ETA), Unemployment Insurance Service, of the U.S. Department of Labor. Measures representing the number of weeks compensated under State UI, UCFE, and UCX Programs are from Form ETA5159: Claims and Payment Activities. Average monthly covered employment data for all employers are from Form ETA202: Covered Employment and Wages. These measures were used to calculate the Unemployment Insurance Rate for states in the Add Health Contextual Database.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
DL1	N/A	Number of weeks compensated under UI, UCFE, and UCX Programs, 1995
DL2	N/A	Number of weeks compensated under UI, UCFE, and UCX Programs, 1993
DL3	N/A	Number of weeks compensated under UI, UCFE, and UCX Programs, 1990
DL4	N/A	Average monthly covered employment, 3rd quarter 1993
DL5	N/A	Average monthly covered employment, 4th quarter 1993
DL6	N/A	Average monthly covered employment, 1st quarter 1994
DL7	N/A	Average monthly covered employment, 2nd quarter 1994
DL8	N/A	Average monthly covered employment, 3rd quarter 1994
DL9	N/A	Average monthly covered employment, 4th quarter 1994
DL10	N/A	Average monthly covered employment, 1st quarter 1995
DL11	N/A	Average monthly covered employment, 3rd quarter 1991
DL12	N/A	Average monthly covered employment, 4th quarter 1991
DL13	N/A	Average monthly covered employment, 1st quarter 1992
DL14	N/A	Average monthly covered employment, 2nd quarter 1992
DL15	N/A	Average monthly covered employment, 3rd quarter 1992
DL16	N/A	Average monthly covered employment, 4th quarter 1992

DL24	N/A	Average monthly covered employment, 1st quarter 1990

GB - The Green Book, 1990, 1992, 1994

The Green Book was developed and is maintained by the Committee on Ways and Means, U.S. House of Representatives. Its primary purpose is to provide background material and statistical data on the program characteristics of the major entitlement programs for use in evaluating and analyzing such programs. Appendices provide additional data on topics indirectly related to these programs. The data have been published annually since 1981, biennially since 1994, and are available at the state, census region, and national levels. Among the entitlement programs covered in this data set is Aid to Families with Dependent Children. Also included in the Green Book are data pertaining to Unemployment Compensation.⁹

The following state level measures were obtained from the 1996, 1994, 1992 and 1990 Green Books. The year of publication and the table number of the source follow each variable description.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
GB1	N/A	AFDC average monthly payment per recipient in 1995 (1996 Green Book, Table 8-23)
GB2	N/A	AFDC average monthly payment per family in 1995 (1996 Green Book, Table 8-23)
GB3	N/A	Maximum state AFDC payment for standard family size of 3 in 1995 (1996 Green Book, Table 8-15)
GB4	N/A	Income cutoff for no longer receiving AFDC benefits in 1996 (1996 Green Book, Table 8-17)
GB5	N/A	Average weekly unemployment benefits in 1995 (1996 Green Book, Table 5-5)
GB6	N/A	AFDC average monthly payment per recipient in 1993 (1994 Green Book, Table 10-22)
GB7	N/A	AFDC average monthly payment per family in 1993 (1994 Green Book, Table 10-22)
GB8	N/A	Maximum state AFDC payment for standard family size of 3 in 1993 (1994 Green Book, Table 10-14)
GB9	N/A	Maximum state AFDC payment for standard family size of 3 in 1990 (1994 Green Book, Table 10-14)
GB10	N/A	Income cutoff for no longer receiving AFDC benefits in 1994 (1994 Green Book, Table 10-16)
GB11	N/A	Average weekly unemployment benefits in 1993 (1994 Green Book, Table 7-5)
GB12	N/A	AFDC average monthly payment per recipient in 1991 (1992 Green Book, Table 20)
GB13	N/A	AFDC average monthly payment per family in 1991 (1992 Green Book, Table 20)
GB14	N/A	Average weekly unemployment benefits in 1990 (1992 Green Book, Table 9)
GB15	N/A	Income cutoff for no longer receiving AFDC benefits in 1990 (1990 Green Book, Table 14)

The Green Book is available in hardcover and on CD-ROM from the United States Government Printing Office, Superintendent of Documents, Congressional Sales Office, Washington, DC 20402.

⁹ We wish to thank James Peterson and colleagues at Sociometrics Corporation, Los Altos, CA, for allowing us to use excerpts from their description of this data source.

GT - Gardiner Tobacco Data

State tobacco legislation and use data were provided by Dr. John Gardiner at the University of Illinois at Chicago.¹⁰ Most source measures were obtained from Reducing Youth Access to Tobacco: A Partial Inventory of State Initiatives 1994. Exceptions include the state enforcement program information which was obtained from Attachment 6 to FFY 1996 Block Grant Application, and the percent of population in grades 9-12 smoking frequently measure, which was obtained from the “Youth Risk Behavior Surveillance-United States, 1993” report published by CDC in 1995.¹¹

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
GT1	Var. 10A	No state enforcement program is in place for tobacco laws, 1996
GT2	Var. 10B	State tobacco law enforcement program for dissemination of information is in place, 1996
GT3	Var. 10C	State tobacco law enforcement program for enforcement in response to complaints, stings/inspections for enforcement, warning, is in place, 1996
GT4	Var. 10D	State tobacco law enforcement program for citations, fines is in place, 1996
GT5	Var. 10E	State tobacco law enforcement program for administrative cases, civil suits brought, criminal arrests, is in place 1996
GT6	Var. 10F	State tobacco law enforcement program for education measurement compliance is in place 1996
GT7	Var. 12A	Localities can enforce youth access, respond to complaints, within the state, 1994
GT8	Var. 12B	Localities actively enforce youth access within the state, 1994
GT9	Var. 12C	Localities can only enforce when delegated or with permission by the state, 1994
GT10	Var. 12D	Localities are preempted from enforcement by state law, 1994
GT11	Var. 12E	Localities can enforce but may not pass stricter laws within the state, 1994
GT12	Var. 15A	No state vending machine restrictions are in place, 1994
GT13	Var. 15B	Vending machines are banned by the state from locations accessible to youth, only allowed in businesses holding liquor licenses, 1994
GT14	Var. 15C	Vending machines in the state are restricted to limited placement, requiring that licensee ensure minors do not have access (no specific restriction) supervision, 1994
GT15	Var. 15D	State vending machines restrictions require locking device, signs, 1994
GT16	Var. 15E	State vending machine restrictions require enforcement authority, 1994
GT17	Var. 16	Enforcement of vending machine restrictions in state: 1 = N/A; 2 = active; 3 = no active enforcement; 4 = limited enforcement, 1994
GT18	Var. 29A	No marketing restrictions in the state, 1994
GT19	Var. 29B	Tobacco marketing prohibited by the state on billboards within 500 feet of schools and/or churches, advertising for smokeless must contain warning, no advertising on lottery tickets or video games, 1994
GT20	Var. 29C	Tobacco marketing restrictions in the state include: free samples are prohibited through mail; free samples restricted; prohibition on free samples; prohibition on free samples to those under 18; no free samples within 500 feet of schools or other facilities used by those under 18; or prohibition on single sales, 1994
GT21	Var. 29D	Restrictions for tobacco marketing on public transportation or state property are in place in the state, 1994
GT22	Var. 36A	Full time equivalent (FTE) staff on tobacco control, 1994
GT23	Var. 36B	Full time equivalent (FTE) staff on tobacco control, excluding non-profit organizations, 1994

HC - Health Care Finance Administration File

The Health Care Finance Administration provides Medicaid data in the form of an annual report called the HCFA-2082. Medicaid is a jointly-funded, Federal-State health insurance program that covers children, the aged, persons blind, and/or disabled, and people who are eligible to receive federally assisted income maintenance payments. The HCFA-2082 report details Medicaid eligibles, recipients, services and expenditures, by state, for the Federal fiscal year ending on October 1.

Medicaid recipient data and Medicaid medical vendor payment data were obtained for each state from HCFA-2082, 1995 Tables 2 and 10, respectively.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
HCFA1	N/A	Total Medicaid recipients, 1995
HCFA2	N/A	Age 65+ Medicaid recipients, 1995
HCFA3	N/A	Blind Medicaid recipients, 1995
HCFA4	N/A	Disabled Medicaid recipients, 1995
HCFA5	N/A	Medicaid recipients aged 21 years or under, 1995
HCFA6	N/A	Adult AFDC Medicaid recipients, 1995
HCFA7	N/A	Total Medicaid payments, 1995
HCFA8	N/A	Medicaid payments to persons aged 65 and over, 1995
HCFA9	N/A	Medicaid payments to blind persons, 1995
HCFA10	N/A	Medicaid payments to permanently disabled persons, 1995
HCFA11	N/A	Medicaid payments to persons under 21, 1995
HCFA12	N/A	Medicaid payments to adults in AFDC, 1995

These data were obtained from the HCFA Internet site in January 1997. More detailed information is available at the following Internet address: <http://www.hcfa.gov/medicaid/mcaidsad.htm>.

NA - NARAL Abortion Access Data, 1995

The National Abortion and Reproductive Rights Action League (NARAL) Foundation supports abortion-related research and works to educate the public on issues related to reproductive freedom. NARAL and The NARAL Foundation maintain a database tracking state laws and pending legislation related to reproductive rights. They regularly publish “Who Decides? A State-by-State Review of Abortion Rights.” Abortion access data included in the Add Health Contextual Database were obtained from the 1995 version of this document.

More detailed information about The NARAL Foundation and these data is available at the following Internet address: <http://www.naral.org/>. The 1995 version of “Who Decides? A State-by-State Review of Abortion Rights” was obtained from this site in June 1997.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
NA1	N/A	State has laws to protect medical personnel and women seeking health care against blockades and violence, 1995
NA2	N/A	Informed consent law, such as requirement that women receive lectures and state-prepared materials on fetal development, prenatal care and adoption, is in place, 1995
NA3	N/A	State has mandatory waiting period providing that a woman may not obtain an abortion until a specified period of time after receiving a state-mandated lecture or materials, 1995
NA4	N/A	State currently enforces mandatory waiting period, 1995
NA5	N/A	State has parental consent or notice law on the books that is not currently enforced, 1995
NA6	N/A	State has laws that prevent a minor from obtaining an abortion without parental consent or notice, or without court order or physician waiving the requirement 1995
NA7	N/A	State excludes abortion from state medical assistance program except in the case of life endangerment, 1995
NA8	N/A	State funds abortion in cases of life endangerment, rape or incest, 1995
NA9	N/A	State funds abortion in cases of life endangerment, rape, incest, and also under limited health circumstances, 1995
NA10	N/A	State funds abortion in all or most circumstances, 1995

NC - National Center for Health Statistics Natality Tapes

Birth statistics are collected by the National Center for Health Statistics (NCHS) through the Vital Statistics Cooperative Program each calendar year. Live births by race for married and unmarried women were obtained from NCHS for 1989, 1990 and 1991, from the Detail Natality Data Files. These data include residents of the U.S. only, and are allocated to counties by place of mother's residence.

Race of child and age and marital status of mother classifications are based on the 1989 revision of the U.S. Standard Certificate of Live Birth. For these data, the race of the child is primarily determined by the race of the mother. If the race of the mother is unknown, the race of the father is assigned to that of the child. In cases where both mother's and father's race is unknown, race is electronically imputed. Age of mother is calculated from the mother's birth date or coded as stated on the certificate. In instances when a computed or coded mother's age fell below 10 years or over 50 years, the mother's age was imputed. Since 1989, marital status has been reported directly on the birth certificate in most states. If marital status is not stated, the mother is considered married. However, in California, Connecticut, Michigan, Nevada, New York and Texas, marital status does not appear on the birth certificate and is inferred from a comparison of the child's and parents' surnames.

Further details concerning birth characteristics and the source of these data can be obtained from the National Center for Health Statistics Internet site: <http://www.cdc.gov/nchswww/nchshome.htm>.

PE - Population Estimates, U.S. Bureau of the Census

Population estimates for each relevant year, and for population subgroups were obtained from the U.S. Bureau of the Census Internet site. State populations are estimated by the U.S. Bureau of the Census using the cohort-component method to update population counts from the 1990 Census. Using this approach, the Census count of the population for each birth cohort is adjusted, separately by sex and race/ethnicity, for the impact of each of the four components of population change: births, deaths, interstate migration, and international migration. That is, the state counts are incremented by both the number of births that occurred in the state during the interval and by net migration into the state, and decremented by the number of deaths that occurred. Estimates of the number of births and deaths in the state during the interval are based on data from the National Center for Health Statistics and the Federal State Cooperative Program for Population Estimates (FSCPE). Estimates of interstate migration are based on an annual abstract of federal tax returns provided by the IRS that allows an analysis of changes in state of residence from one year to the next. Because no demographic data is provided on tax returns, these data are also matched to a 20% sample of information from the Social Security Administration Application File to obtain information on how migration patterns are related to age, sex, and race. Data on international migration, including the movement of undocumented migrants, are obtained from the Immigration and Naturalization Service (INS). Once this information is used to obtain state population estimates, a second step ratio-adjustment procedure known as raking is used to estimate county populations by age, sex, and race/Hispanic origin. That is, the state population estimates, together with estimates of the total population of each county, are used as control totals that allow the ratio adjustment of county population estimates by age, sex, and race/ethnicity such that they sum to the total estimated population of the state. For more detailed information on these estimation procedures, see the complete documentation provided by the Census Bureau at the following Internet address: <http://www.census.gov/pub/population/documentation/twps0003.txt>.

SD - School District Data Book, 1990

The School District Data Book (SDDB) is a compilation of social, economic and administrative data for states, counties, and public school districts in the United States. The SDDB was developed by The MESA Group using data supplied by the Census Bureau and the National Center for Education Statistics (NCES), U.S. Department of Education. The data library consists of special 1990 Census tabulations, administrative data from the NCES 1989-90 Common Core of Data, and financial data from the 1989-90 Survey of School District Finances produced by the Census Bureau for the Department of Education. The complete SDDB library provides up to 200,000 data items for each school district or county in the United States.

The SDDB source variables used in the Add Health Contextual Database include the number of at risk children and school aged children in each county. The definition of "at risk" can be found in Appendix A.

The SDDB is available on 44 CD-ROMs, complete with mapping software and extraction tools. Further information about the SDDB data library or project can be obtained from the National Center for Education Statistics, U.S. Department of Education, 555 New Jersey Avenue, NW, Room 408, Washington, DC 20208.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
SD1	D031	At risk pre-school age children (4-5 years)
SD2	D032	At risk school age children (6-19 years)
SD3	D072	Relevant children, 4 years old
SD4	D073	Relevant children, 5 years old
SD5	D074	Relevant children, ages 5-13 years
SD6	D075	Relevant children, ages 14-17 years
SD7	D076	Relevant children, ages 18-19 years

SG - State Government Finances, U.S. Bureau of the Census

State government finance data are collected by the Bureau of the Census each year during its Annual Survey of Government Finances. State expenditures have been obtained for the 1993 fiscal year ending on June 30, except for several states that have different ending dates, including: Alabama and Michigan (September 30); New York (March 31); and Texas (August 31).

General expenditures are defined as all expenditures except those classified as utility, insurance or liquor store expenditures. Direct general expenditures are those that are non-intergovernmental. For a more detailed description of each type of expenditure, see the source documentation for local government finances, CU - USA Counties, 1994. State expenditure data were downloaded from the U.S. Bureau of the Census internet site: [//www.census.gov/pub/govs/estimate/](http://www.census.gov/pub/govs/estimate/) in January 1997.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
SGF1	N/A	Total direct general expenditures in thousands of dollars, 1993
SGF2	N/A	Direct general expenditures for education in thousands of dollars, 1993
SGF3	N/A	Direct general expenditures for welfare in thousands of dollars, 1993
SGF4	N/A	Direct general expenditures for hospitals in thousands of dollars, 1993
SGF5	N/A	Direct general expenditures for health in thousands of dollars, 1993
SGF6	N/A	Direct general expenditures for police protection in thousands of dollars, 1993
SGF7	N/A	Direct general expenditures for natural resources in thousands of dollars, 1993
SGF8	N/A	Direct general expenditures for parks and recreation in thousands of dollars, 1993
SGF9	N/A	Direct general expenditure for housing and community development in thousands of dollars, 1993

SH - School Health Policies and Programs Study, 1994

The School Health Policies and Programs Study (SHPPS) 1994 is a national survey of school policies and programs conducted by the Division of Adolescent and School Health, National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention. Data related to school health programs such as health education, physical education, health services, food service and health policies were collected at the state, school district, and individual school levels.

SHPPS data included in the Add Health Contextual Database consist of state programs and requirements for school health education, health services and health policies. The state level portion of the SHPPS data collection was conducted via mail from March-June 1994. All 51 state education agencies completed the questionnaires associated with these school health components. Further information regarding the study methods can be found in a special issue of the *Journal of School Health* devoted to the SHPPS study.¹² Public use SHPPS data can be obtained from the Division of Adolescent and School Health, National Center for Chronic Disease Prevention and Health Promotion, Centers for Disease Control and Prevention, 4770 Buford Highway, NE, MS-K33, Atlanta, GA 30341-3724.

The original source data are supplied as separate files, one for each school health component. Thus, source variables used in the contextual database are listed below by each component. The following state level school health education requirement measures are used in the Add Health Contextual Database:

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
SH1	Q9a	Health education is not required in elementary schools by state (1=yes/2=no)
SH2	Q9c	Health education is required in elementary schools by state as a separate course devoted almost entirely to health topics (1=yes/2=no)
SH3	Q10a	Health education is not required in middle/junior high schools by state (1=yes/2=no)
SH4	Q10c	Health education is required in middle/junior high schools by state as a separate course devoted almost entirely to health topics (1=yes/2=no)
SH5	Q11a	Health education is not required in senior high schools by state (1=yes/2=no)
SH6	Q11c	Health education is required in senior high schools by state as a separate course devoted almost entirely to health topics (1=yes/2=no)
SH7	Q12a1	State does not require "alcohol and other drug use prevention" topic to be offered in any level of schooling (1=yes/2=no)
SH8	Q12a2	State does not require "community health" topic to be offered in any level of schooling (1=yes/2=no)
SH9	Q12a3	State does not require "conflict resolution/violence prevention" topic to be offered in any level of schooling (1=yes/2=no)
SH10	Q12a4	State does not require "consumer health" topic to be offered in any level of schooling (1=yes/2=no)
SH11	Q12a5	State does not require "C.P.R." topic to be offered in any level of schooling (1=yes/2=no)
SH12	Q12a6	State does not require "death and dying" topic to be offered in any level of schooling (1=yes/2=no)
SH13	Q12a7	State does not require "dental and oral health" topic to be offered in any level of schooling (1=yes/2=no)
SH14	Q12a8	State does not require "dietary behaviors and nutrition" topic to be offered in any level of schooling (1=yes/2=no)
SH15	Q12a9	State does not require "disease prevention and control" topic to be offered in any level of schooling (1=yes/2=no)

¹² School Health Policies and Programs Study: A Summary Report, *Journal of School Health*, October 1995, Vol.65, No. 8.

Variable Name:	Source Name:	Description:
SH16	Q12a10	State does not require “emotional and mental health” topic to be offered in any level of schooling (1=yes/2=no)
SH17	Q12a11	State does not require “environmental health” topic to be offered in any level of schooling (1=yes/2=no)
SH18	Q12a12	State does not require “first aid” topic to be offered in any level of schooling (1=yes/2=no)
SH19	Q12a13	State does not require “growth and development” topic to be offered in any level of schooling (1=yes/2=no)
SH20	Q12a14	State does not require “HIV prevention” topic to be offered in any level of schooling (1=yes/2=no)
SH21	Q12a15	State does not require “human sexuality” topic to be offered in any level of schooling (1=yes/2=no)
SH22	Q12a16	State does not require “injury prevention and safety” topic to be offered in any level of schooling (1=yes/2=no)
SH23	Q12a17	State does not require “personal health” topic to be offered in any level of schooling (1=yes/2=no)
SH24	Q12a18	State does not require “physical activity and fitness” topic to be offered in any level of schooling (1=yes/2=no)
SH25	Q12a19	State does not require “pregnancy prevention” topic to be offered in any level of schooling (1=yes/2=no)
SH26	Q12a20	State does not require “sexually transmitted disease (STD) prevention” topic to be offered in any level of schooling (1=yes/2=no)
SH27	Q12a21	State does not require “suicide prevention” topic to be offered in any level of schooling (1=yes/2=no)
SH28	Q12a22	State does not require “tobacco use prevention” topic to be offered in any level of schooling (1=yes/2=no)

The following state level school health service requirement measures are used in the Add Health Contextual Database:

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
SH29	Q4b	State funds school-based health clinics (1=yes/2=no)
SH30	Q4c	State funds school-linked health clinics (1=yes/2=no)
SH31	Q5	State requires schools to offer school health nurse services (1=yes/2=no)
SH32	Q9a	State school attendance policy for students not properly immunized (1=not allowed to attend school/2=no policy/3=allowed to attend/4=other policy/9=missing)
SH33	Q16a	No state requirement to increase the likelihood that cases of physical and sexual abuse will be detected and reported (1=yes/2=no)
SH34	Q35a	In-service training to school health services staff on school health services topics was not offered by state during the last two years (1=yes/2=no)
SH35	Q35b	During the past two years, state has offered in-service training to school health services staff on alcohol and drug use prevention (1=yes/2=no)
SH36	Q35e	During the past two years, state has offered in-service training to school health services staff on HIV prevention (1=yes/2=no)
SH37	Q35i	During the past two years, state has offered in-service training to school health services staff on pregnancy prevention/family planning (1=yes/2=no)
SH38	Q35k	During the past two years, state has offered in-service training to school health services staff on suicide prevention (1=yes/2=no)
SH39	Q35l	During the past two years, state has offered in-service training to school health services staff on tobacco use prevention (1=yes/2=no)
SH40	Q35n	During the past two years, state has offered in-service training on violence prevention (1=yes/2=no)

The following state level school health policy requirement measures are used in the Add Health Contextual Database:

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
SH41	Q4a	No state recommendations for school districts or schools concerning their tobacco use policies (1=yes/2=no)
SH42	Q4d	State recommends that school districts or schools include rules against tobacco use by students in their tobacco use policies (1=yes/2=no)
SH43	Q4e	State recommends that schools or school districts include rules against tobacco use by school staff in their tobacco use policies (1=yes/2=no)
SH44	Q4j	State recommends that schools or school districts include procedures for communicating tobacco use policy to students, school staff, and parents/guardians (1=yes/2=no)
SH45	Q9a	No state recommendations for school districts or schools concerning their alcohol and drug use policies (1=yes/2=no)
SH46	Q9d	State recommends that schools or school districts include rules against alcohol and drug use by students in their alcohol and drug use policies (1=yes/2=no)
SH47	Q9e	State recommends that schools or school districts include rules against alcohol and drug use by school staff in their alcohol and drug use policies (1=yes/2=no)
SH48	Q9j	State recommends that schools or school districts include procedures for communicating alcohol and drug use policy to students, school staff, and parents/guardians (1=yes/2=no)
SH49	Q12a	No state recommendations for school districts or schools concerning their students' physical fighting policies (1=yes/2=no)
SH50	Q12d	State recommends that schools or school districts include rules against fighting by students in their policies on students' physical fighting (1=yes/2=no)
SH51	Q12h	State recommends that schools or school districts include procedures for communicating policies on students' physical fighting to students, school staff, and parents/guardians (1=yes/2=no)
SH52	Q13a	No state recommendations for school districts or schools concerning their weapons policies (1=yes/2=no)
SH53	Q13d	State recommends that schools or school districts include rules against weapon possession and use by students in their weapons policy (1=yes/2=no)
SH54	Q13e	State recommends that schools or school districts include rules against weapon possession and use by school staff in their weapons policy (1=yes/2=no)
SH55	Q13j	State recommends that schools or school districts include procedures for communicating weapons policy to students, school staff, and parents/guardians (1=yes/2=no)
SH56	Q17	State requires that school districts or schools have a policy to protect students from sexual harassment (1=no/2=yes)

ST- Census of Population and Housing, 1990: Summary Tape File 3A

The Census of Population and Housing, 1990: Summary Tape File 3A (STF 3A) contains detailed tabulations of population and housing characteristics produced from the 1990 Decennial Census. It contains over 2,300 “cells” (variables), providing information on age, race, ethnic (Hispanic), and sex composition; marital status; children ever born; migration; year moved into residence; education; labor force participation; unemployment; income in 1989; poverty status; occupation; industry; household type; housing value; plumbing facilities; year structure built; etc. These variables are derived from the 1990 Census long-form questionnaire that approximately 1 in 6 of all housing units in the U.S. received. Thus, data in the STF 3A are sample data that have been weighted by the Census Bureau to represent the total population of the geographic units to which they pertain.

Identical data items are available for states and their subareas in hierarchical sequence down to the block group. These subareas include counties, county subdivisions, places, census tracts/block numbering areas (BNAs), and block groups. Also included in the STF 3A is information for state portions of American Indian and Alaska Native areas, Metropolitan Statistical Areas (MSAs)/ Consolidated Metropolitan Statistical Areas (CMSAs)/Primary Metropolitan Statistical Areas (PMSAs), and urbanized areas.¹³ The STF 3A is the principal, national-in-scope source of contextual data at the tract/BNA and block group levels. Only data for counties, tracts and block groups are provided in the Add Health Contextual Database.

Census block groups and tracts are defined in the Variable Naming Conventions section of the Introduction of this document. For further details, the reader is strongly encouraged to obtain a copy of the STF 3A technical documentation¹, which provides detail about the structure, content, and variable and place definitions of this data source. The data are available in dBASE III format on 61 CD-ROMs from the Data User Services Division, Customer Services Division, Bureau of the Census, U.S. Department of Commerce, Washington, DC 20233. Alternatively, the data are available in SAS for Windows or SPSS for Windows formats on 4 CD-ROMs from Wessex Corporation, 1015 Tower Road, Winnetka, IL 60093.

NOTE: Original variables are NOT in the Add Health Contextual Database

UC - Uniform Crime Reports, U.S. Federal Bureau of Investigation

Data included in the Add Health Contextual Database obtained from the Uniform Crime Reports (UCR) collection are county-level counts of arrests and offenses for the violent crimes of murder, rape, robbery, and violent assault, and the property crimes of burglary, larceny, auto theft, and arson. These data are provided to the U.S. Federal Bureau of Investigation by agencies reporting information on arrests and offenses for a period covering between six and eleven months of the year. The counts are ratio adjusted, by multiplying them by the inverse of the proportion of the year for which they apply, to reflect 12-month equivalents. Data from agencies that reported information covering less than six months of the year are not included in the UCR collection. Due to this fact, the county population count provided is for that part of the population residing in jurisdictions providing six or more months of data. Note also, that data for jurisdictions located in multiple counties are allocated to the county containing the largest component of that jurisdiction. Some jurisdictions, such as state parks and state police, report only for the state as a whole and their reports are allocated to individual counties proportionate to their share of the state population of jurisdictions reporting six or more months of data.

1993 crime and arrest data were obtained from the ICPSR (Inter-University Consortium for Political and Social Research) National Archive of Criminal Justice Data Internet site.¹⁴ More detailed information regarding these data and the way they are collected and reported can be found at the following Internet site: <http://www.icpsr.umich.edu/NACJD/home.html>.

Variable Name:	Source Name:	Description:
UCR19	V13 (Adult)	Number of adult property crime arrests in jurisdictions reporting 6-12 months of data, 1993
UCR20	V16 (Adult)	Number of adult robbery arrests in jurisdictions reporting 6-12 months of data, 1993
UCR21	V17 (Adult)	Number of adult aggravated assaults arrests in jurisdictions reporting 6-12 months of data, 1993
UCR22	V18 (Adult)	Number of adult burglary arrests in jurisdictions reporting 6-12 months of data, 1993
UCR23	V19 (Adult)	Number of adult larceny arrests in jurisdictions reporting 6-12 months of data, 1993
UCR24	V20 (Adult)	Number of adult vehicle theft arrests in jurisdictions reporting 6-12 months of data, 1993

US - United States Summary, U.S. Bureau of the Census

The United States Bureau of the Census publishes a summary volume which contains census information at the national level. The following variables were obtained from the 1990 United States Summary volume, publication CP-2-1, Social and Economic Characteristics section, Table 20: Occupation of Employed Persons: 1990, page 20. These variables represent the number of females in the U.S. aged 16 and over employed in general census occupational categories, and the total number of employed persons in the U.S. aged 16 and over.

NOTE: Original variables are NOT in the Add Health Contextual Database

Variable Name:	Source Name:	Description:
US1	N/A	Females in the U.S. aged 16 years and over employed in executive, administrative, or managerial occupations
US2	N/A	Females in the U.S. aged 16 years and over employed in professional specialty occupations
US3	N/A	Females in the U.S. aged 16 years and over employed in technician and related support occupations
US4	N/A	Females in the U.S. aged 16 years and over employed in sales occupations
US5	N/A	Females in the U.S. aged 16 years and over employed in administrative support occupations
US6	N/A	Females in the U.S. aged 16 years and over employed in private household service occupations
US7	N/A	Females in the U.S. aged 16 years and over employed in protective service occupations
US8	N/A	Females in the U.S. aged 16 years and over employed in other service occupations
US9	N/A	Females in the U.S. aged 16 years and over employed in farming, forestry, or fishing occupations
US10	N/A	Females in the U.S. aged 16 years and over employed in precision production, craft, and repair occupations
US11	N/A	Females in the U.S. aged 16 years and over employed as machine operators, assemblers, or inspectors
US12	N/A	Females in the U.S. aged 16 years and over employed as transportation and material moving operators
US13	N/A	Females in the U.S. aged 16 years and over employed as handlers, equipment cleaners, helpers, or laborers
US14	N/A	Employed persons in the U.S. aged 16 years and over
