### **\* PARTNER**

When the Wave III field work began, approximately one half of the fielded Add Health respondents were randomly flagged to be part of the Partner Sample. When a respondent with PARTNER = 1 was interviewed and if the respondent had an eligible relationship, the respondent was asked to recruit his/ her partner for the study. This relationship is identified as the Couple Sample (CP) relationship in Section 19. Additional information about the Couple Sample is available in the document “sect19 descriptions.pdf.”

### **\*\* COUPLE**

The eligible partner, when interviewed for the Couple Sample, has a value of 1 for COUPLE. Original Add Health respondents only have a value of 0 for COUPLE. This variable was used for questionnaire branching and to identify interviews from partners of Add Health respondents. The partner interview data are available in separate files by special request.

### **\*\*\* PRMOM and PRPOP**

Variables PRMOM and PRPOP were created from responses to the Wave I or II household roster information. If a respondent indicated that he/ she lived with a mother figure, but not a father figure, then the value for the father figure would be coded as missing and likewise if they lived with a father figure and not a mother figure. When a respondent did not list both a mother and father figure, then he/ she was asked the questions “Who in your household acts a mother figure?” and “Who in your household acts as a father figure?” which had no one as an allowable response. Respondents who lived alone at the time of their last interview also received codes of 99 (no one) for PRMOM and PRPOP.
