**\*H3WP6Y**

The year of death for PRPOP given by some respondents is prior to 1996, even though the values for PRPOP were from the Wave I (1995) or II (1996) interview. These values have been left as answered by the respondent.

**\*H3WP9**

The range for the age of the respondent at the death for his/ her mother exceeds the range of the age of Wave III respondents for 7 cases. These data values were not recoded as it is possible that the respondent could have misinterpreted the question and thought we asked for the age of his/ her mother when she died.

**\*H3WP65 and H3WP73**

Due to a programming error, the response of not applicable was not available for these questions.

**Section 03 Note**

Some of the Section 03 logic used in the pretest was reported by the field interviewers as being too complicated and confusing for the respondent. As a result, this section was reworked for the main study. Questions not asked of pretest respondents are coded as 5, 95, 995, or 9995.
