

Add Health Parent Study:

Adding Parents to Add Health to Study

Aging Processes &

Intergenerational Linkages

V. Joseph Hotz

Add Health User's Conference

July 23, 2018

Add Health Parent Study (AHPS) funding:

R21 AG042663-01, *Locating the Parents of Add Health*, K. M. Harris, V. J. Hotz, & J. A. Seltzer, PIs.

R01 AG042794-01, *Add Health Parent Study: Phase I*, V. J. Hotz & K. M. Harris, PIs.

PIs:

Kathleen Mullan Harris, PI, UNC

V. Joseph Hotz, PI, Duke

Co-PIs:

Suzanne Bianchi (1952-2013)

Jason Boardman, Colorado

Virginia Chang, NYU

Angela Duckworth, Penn

Jack Iwashyna, Michigan

Hedwig Lee, Washington U-St. Louis

Shelly Lundberg, UCSB

Matt McQueen, Colorado

Candice Odgers, UC-Irvine

Lisa Pearce, UNC

Seth Sanders, Duke

Judith A. Seltzer, UCLA

Karen Sugden, Duke

Eric Whitsel, UNC

Emily Wiemers, U. Mass-Boston

Yang Claire Yang, UNC

Staff:

Francesca Florey, Project Manager, Duke

Mandy Monath, Data Manager, UNC

Katsuya Oi, Post-Doc, Duke

What is the AHPS?

- A new data source to study aging processes in 2 generations & intergenerational linkages in health, behaviors & relationships.

Origins of Add Health Parent Study

- **Add Health Parent Study** leverages **Add Health Study**:
 - Nationally-representative, prospective cohort study
 - Rich longitudinal social, environmental, biological, genetic data.
- In **Wave I** (1994-95) of **Add Health Study**, a **parent** (mostly mothers) of each **Add Health Sample Member (AHSM)** was interviewed.
- Parents referred to as **Wave I Parent (WIP)**.
- These data referred to as **Parents Phase 1**.
 - Asked about their (then adolescent) children, their relationships with them and their own health.
 - Much of data collected parallels that collected in previous (& current) Waves of **Add Health Study**.

Data Collected on Parents in Wave I of **Add Health Study**

A: About themselves

- Age, race, ethnicity
- Marital status
- Religion, church attendance
- Education
- Work, disability
- Income, material hardship
- Neighborhood conditions
- Marital history
- Life happiness
- **General health**
- **Health behaviors (alcohol & tobacco use)**

B: About their Spouse/Partner

- Sex, age, race, ethnicity
- Religion
- Education
- Work, disability
- Public assistance
- Relationship satisfaction
- Life happiness
- **General health**
- **Health behaviors (alcohol & tobacco use)**

C: About their AHSM Child(ren)

- Relationship to child
- Presence of bio parents in household
- Child's friends
- Educational expectations
- Involvement in child's school and schoolwork
- **Relationship with child**
- **Cognitive functioning**
- **Health, health insurance**
- **Birthweight**
- **Health behaviors**
- Communication about sex
- Child's social life
- **Family health history (child, bio mother, bio father)**
- Disability
- For twins: determination of fraternal vs identical

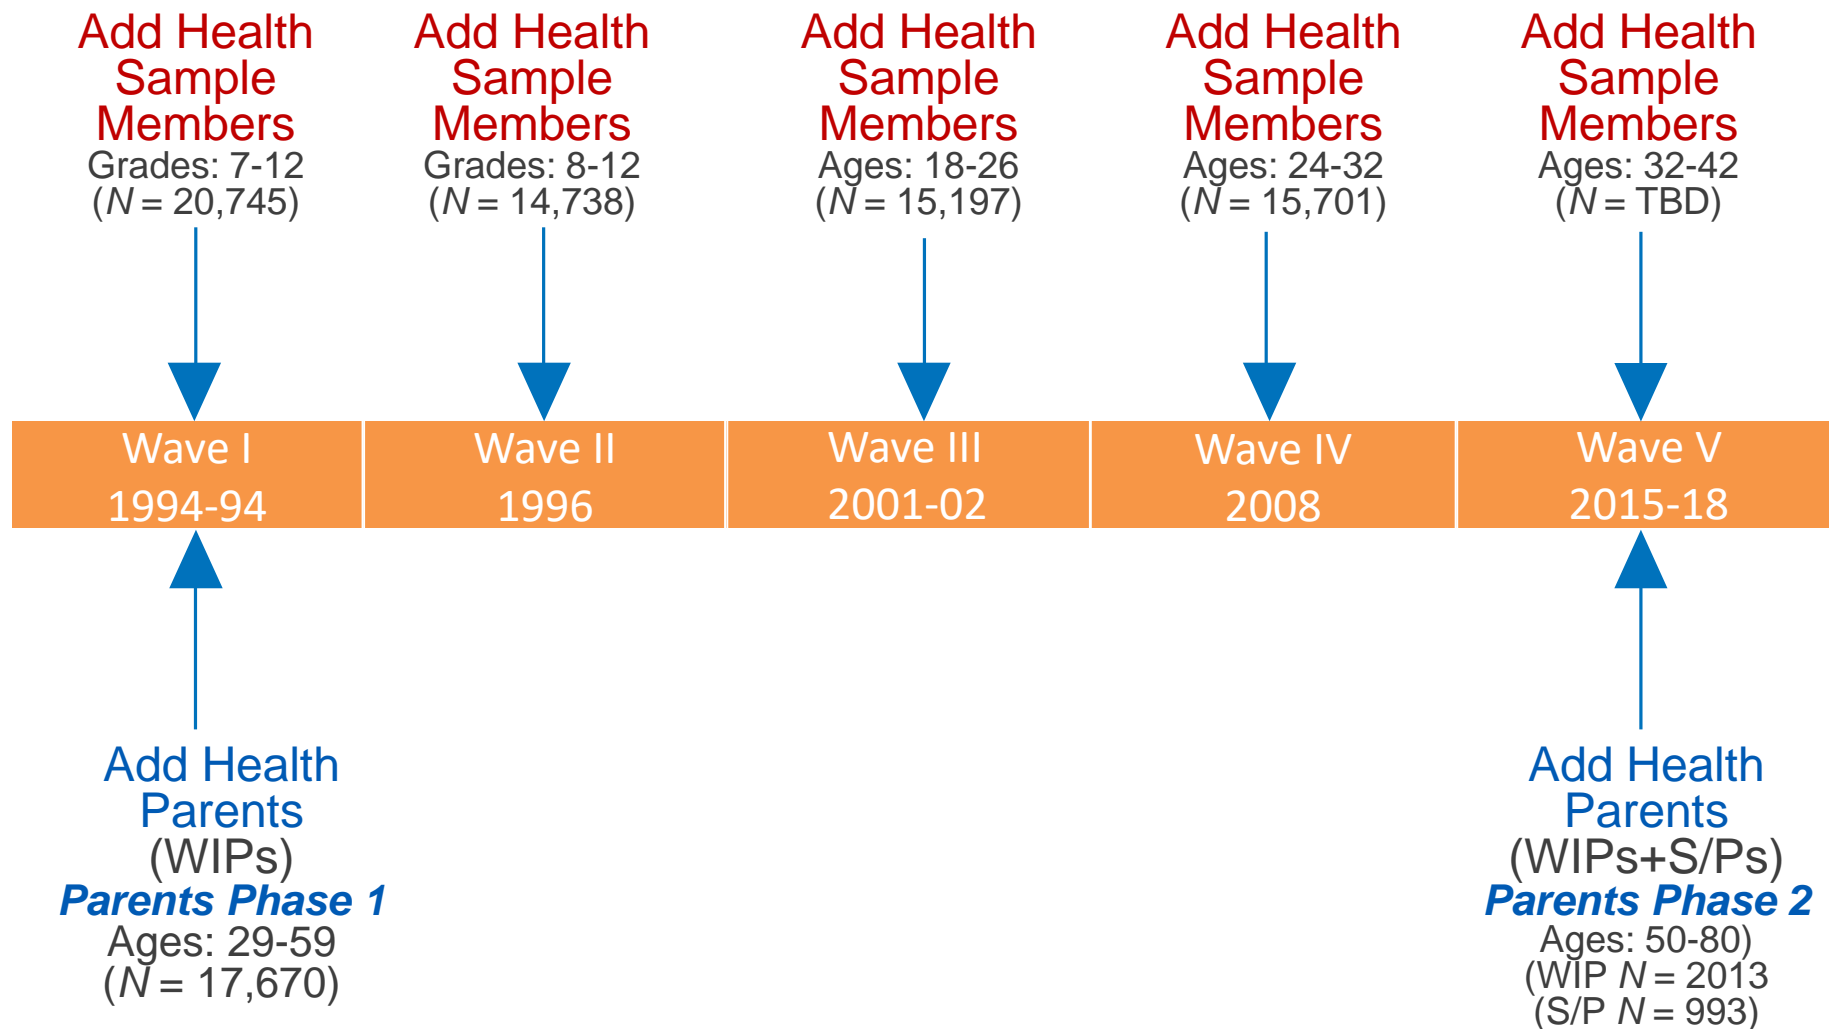

Add Health Parent Study ***(Parents Phase 2)***

Sample Design & Data Collection

What is the Add Health Parent Study?

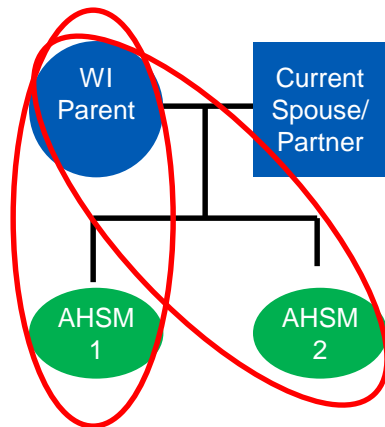

- **Add Health Parent Study** is 20-year *follow-up interview* of a subset of Wave I parents.
- Data collected about their
 - *Health & health behaviors*
 - *Cognition, Personality & Preferences*
 - *Family Relationships & Nature of Family Network*
 - *Economic Capacities & Well-Being*
- Same data also collected from *current spouse/partners* of these parents
- These data referred to as **Parents Phase 2**.

AHPS & Add Health Surveys Timeline

AHPS - Add Health WI “Family Clusters”

WI Family Cluster A

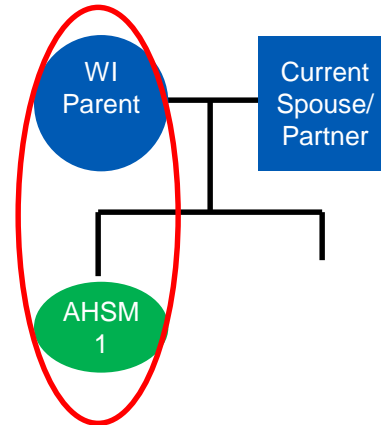

2 AHSM – WI Parent Pairs

2 Parent-Figures

(WI Parent & Current Spouse/Partner)

WI Family Cluster B

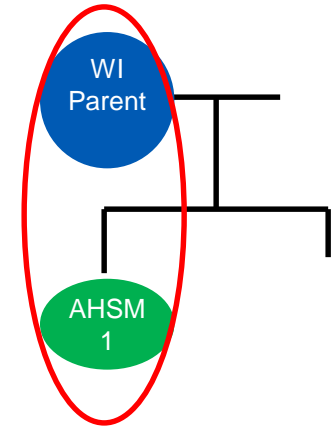

1 AHSM – WI Parent Pair

2 Parent-Figures

(WI Parent & Current Spouse/Partner)

WI Family Cluster C

1 AHSM – WI Parent Pair

1 Parent-Figure

(WI Parent)

- Some Family Clusters include both biological parent-figures of AHSMs; Others include bio parent & step-parent.
- AHSMs in multiple-AHSM Family Clusters include twins, non-twin full sibs &/or half-sibs.

AHPS Sample Targets & Completed Interviews

Target Wave 1 Parents (W1Ps)	3,108
Target Spouse/Partners (60% of interviewed W1Ps)	1,492
Add Health Sample Members of Targeted W1 Parents	3,416
 <i>Completed Sample:</i>	
Wave 1 Parents (W1Ps)	2,013
Spouse/Partners	993
Add Health Sample Members of Completed W1 Parents	2,247

Content of AHPS In-Person Interviews

- **Health and Health Conditions**

- Physical and mental health, medications inventory (**Add Health**, HRS, NSHAP)
- Health insurance, access to care (HRS)
- Health behaviors (**Add Health**, HRS, NSHAP)
- Chronic disease, disability, acute health shocks (**Add Health**; HRS)
- Social integration, support, strain and stress (NSHAP, HRS, MIDUS)

- **Personality, Cognitive Processing & Preferences**

- Big 5 (**Add Health**, Wave IV)
- Duckworth Grit Index (**New**)
- Word Recall Tests (**Add Health**, Wave IV)
- Counting Backwards (HRS)
- Risk & Patience/Time Preferences (**GSOEP**)

- **Relationships btwn generations**

- Gathering Family Rosters (one up, one down) (**PSID**)
- Time & Money Transfers (**PSID**)
- Long Term Transfers & Financial Help (**PSID**)
- Notions of Safety Net provided & expected (**New**)
- Parents' Perceptions & Knowledge of (Adult) Child's situations & behaviors (**New**)

- **Economic & time capabilities**

- Employment (HRS)
- Labor Market Earnings (HRS)
- Retirement: Pensions received & expected (HRS)
- Housing (HRS, **PSID**)
- Assets & Income from Assets (HRS)
- Debt (HRS, **PSID**)

- Consents to link ***Administrative Records*** (present, past & future)
 - ***Medicare & Medicaid***
 - ***Housing valuations*** & foreclosures of place-of-residence
- Collection of ***Family Health Histories*** with leave-behind questionnaire
 - Ask about health conditions & age-of-death for deceased parents.
 - So we have ***health data*** on ***3-generations***.
- Option in future to use ***place-of-residence*** info to link:
 - Economic, demographic status of neighborhoods
 - Food environments
 - Environments for exercise, etc.
 - Others.

Such possibilities for adding linked contextual data through ***Add Health Ancillary Data Process***.

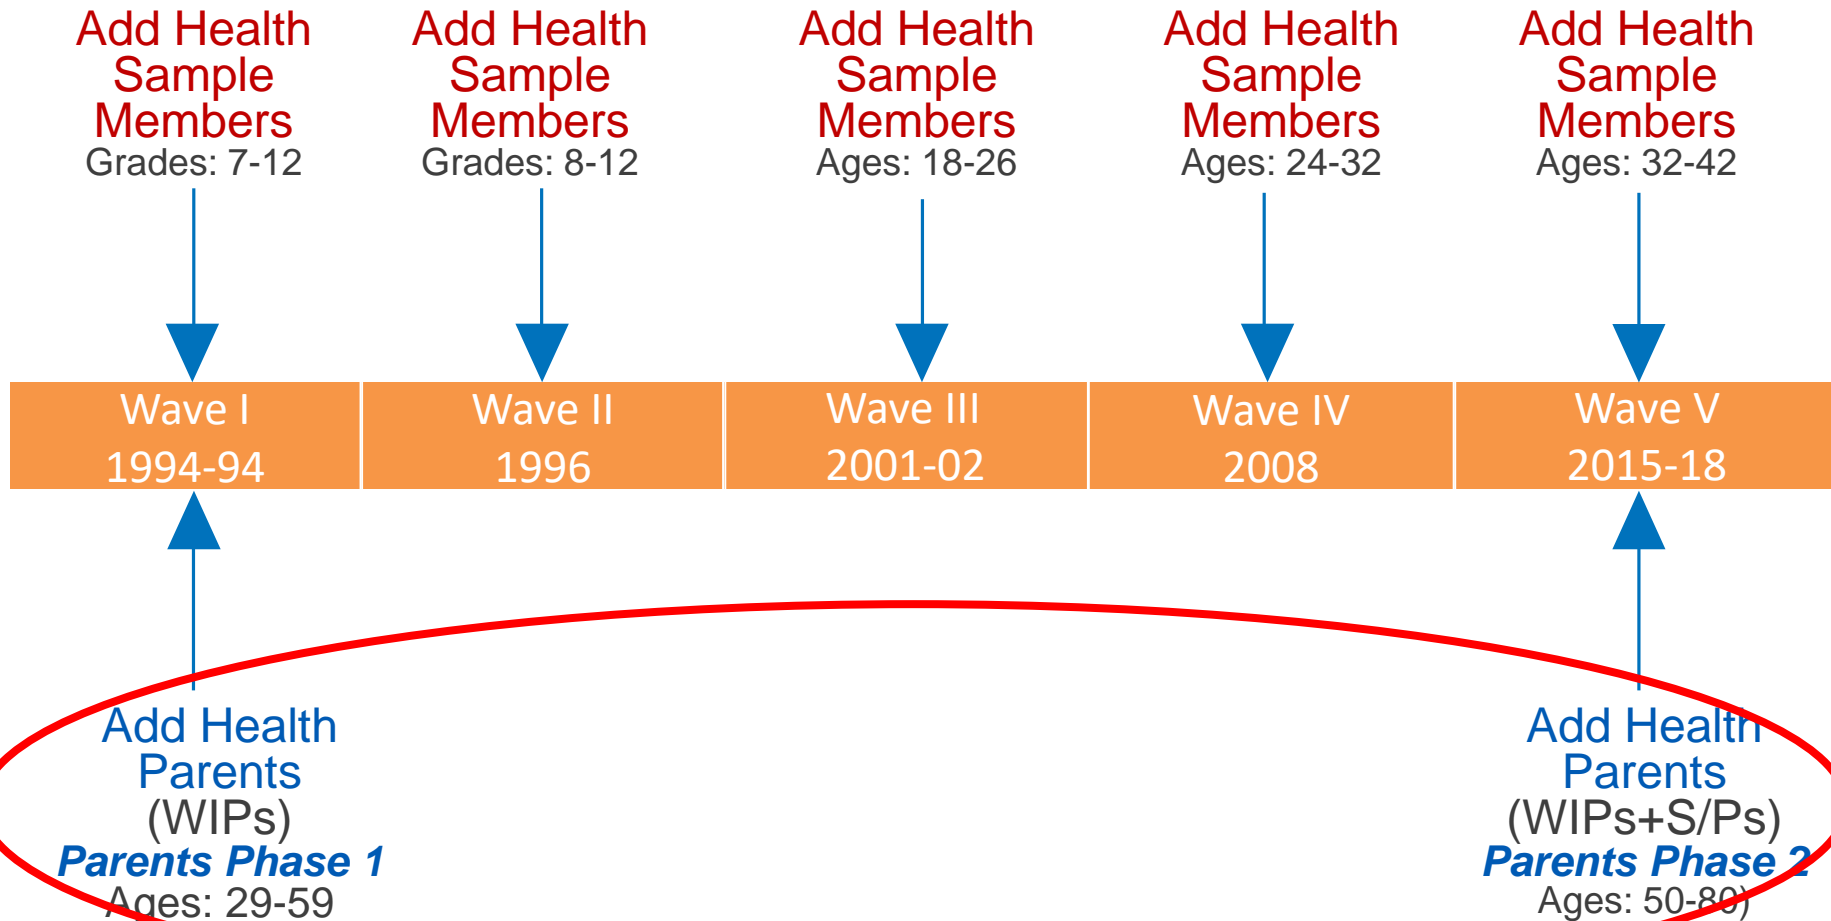

AHPS & Add Health Linked Data: **A Brief Look at the Data**

- Majority of AHPS WIPs interviewed at Wave I (97%) are ***female*** & all ***had children***.
- We ***compare*** data for ***WIPs*** from ***Parents Phase 2 with*** women with at least one child & same age range in ***HRS*** & ***NHANES***.

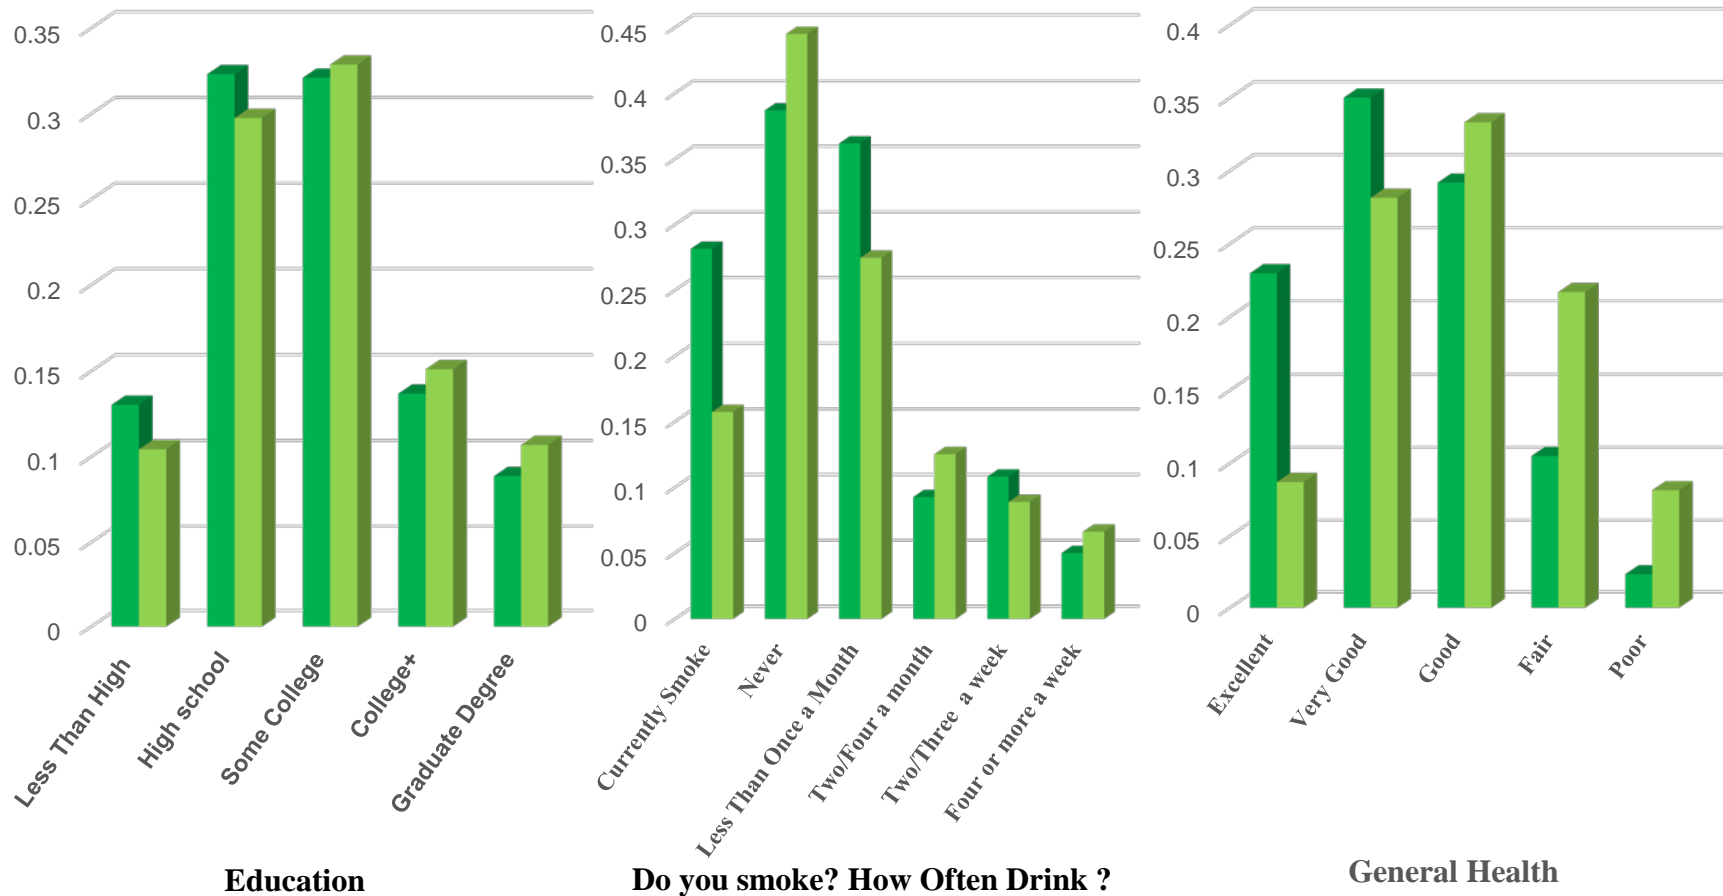

Comparison of AHPS (Parents Phase 2) with HRS & NHANES

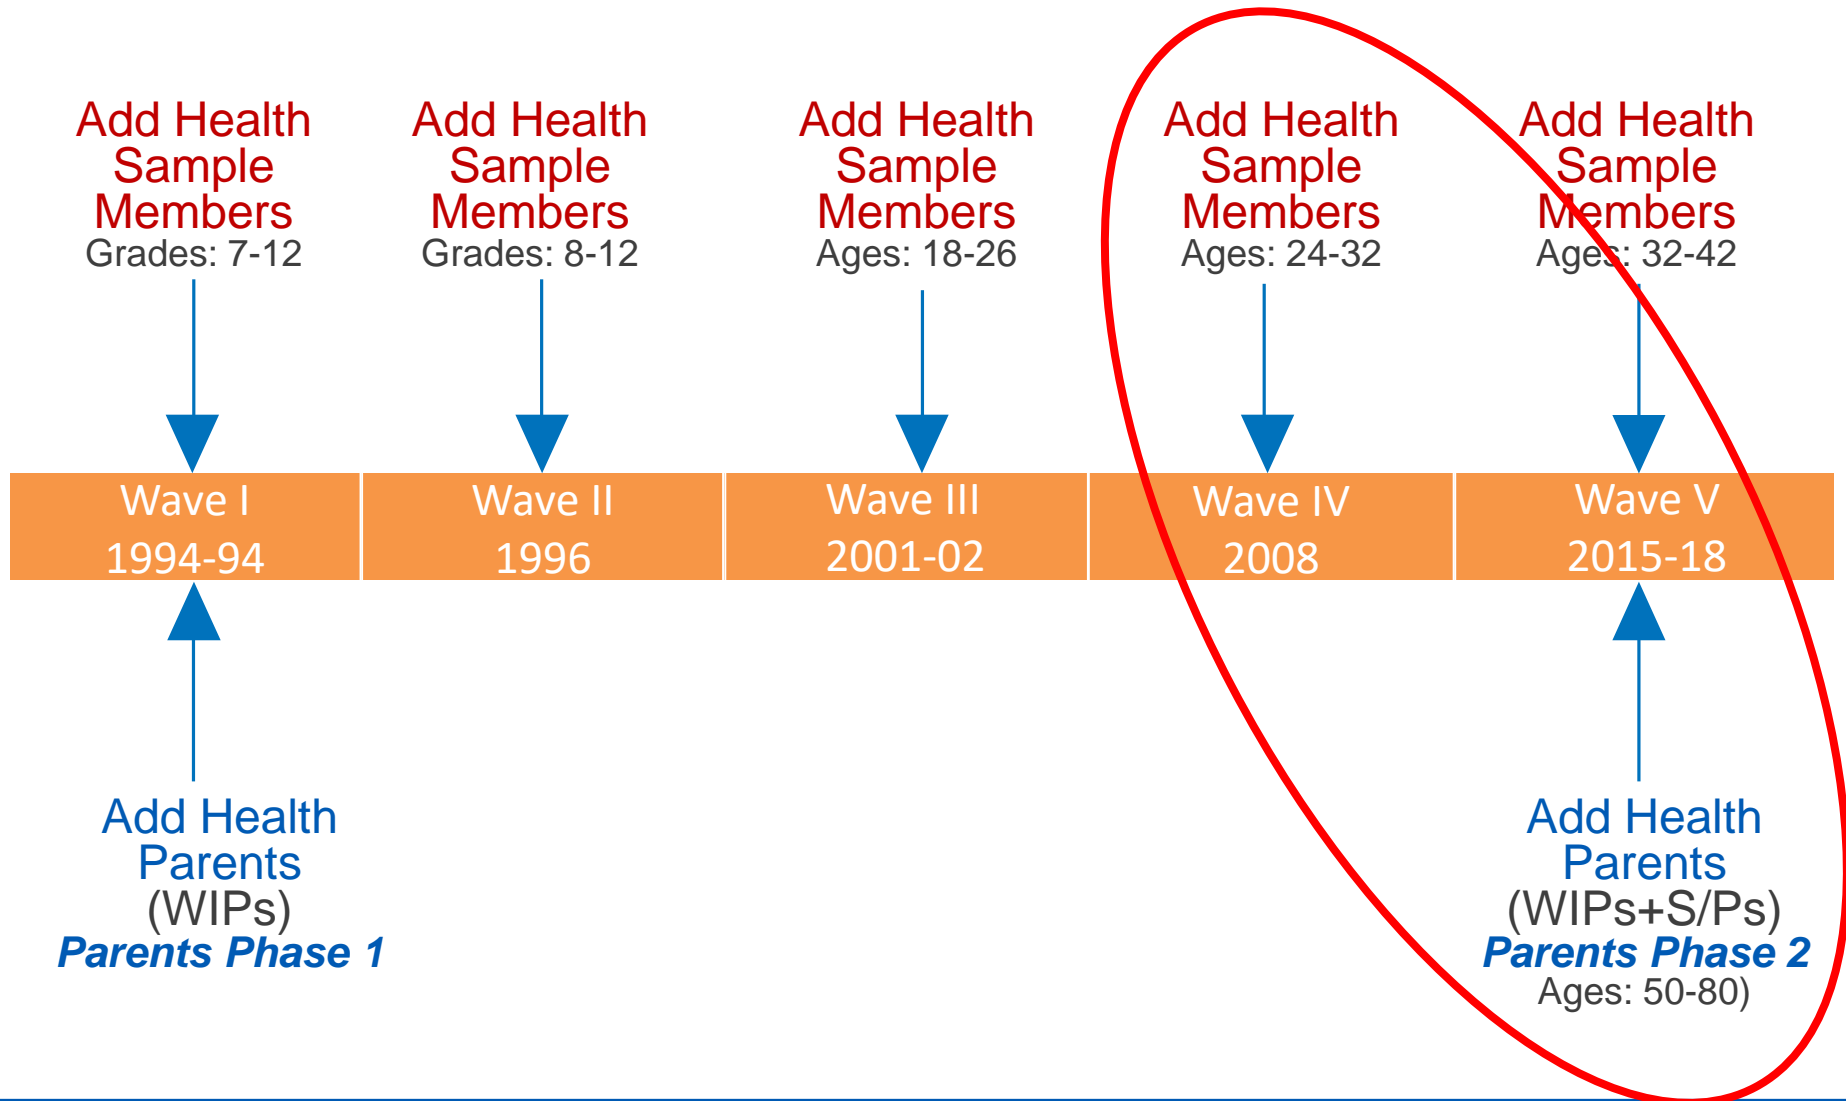

- **Two waves** of data on parents (***Parents Phase 1*** & ***Parents Phase 2***) contain **same measures** of general health, health behaviors & some other outcomes at **ages 29-59 & at 50-80**.
- Thus, one can use parents data to assess how these outcomes **change with age**.

- 1995 Add Health Wave I
- 2016-2017 AHPS

- ***Comparable measures for parents*** (in **AHPS**) & their ***children*** – especially when adults – (in **Add Health**) allow one to analyze ***intergenerational linkages & relationships*** in
 - ***Health & health behaviors***
 - ***Cognition***
 - ***Relationships***
 - ***Economic capacities***

Further Research Questions
using **Linked**
Add Health Parent – **Add Health**
Data

-
- Many ***health conditions & behaviors*** run in families:
 - ***Cardiovascular disease*** (CVD)
 - ***Obesity***
 - ***Substance abuse***, e.g., alcoholism, smoking, drugs.
 - How can we use ***parents' health*** to ***better understand*** their (adult) ***children's health trajectories***?
 - How do ***changes in parents' health & behaviors*** influence & predict their ***children's health trajectories***?

- **Cognitive ability** (e.g., IQ) **predictive** of range of **outcomes**, include **health, education**, etc.
- Growing evidence that **non-cognitive skills, personality traits & aversion to risk & impatience** also **predictors** of **behaviors**, e.g., personal finances, marriage & divorce, etc.
- Are these skills & traits **correlated across generations?**
- Do they help account for **commonalities & differences** in **health & well-being across** the 2 **generations?**

Intergenerational Relationships

- Substantial evidence that ***social connectedness*** (or ***loneliness***) is correlated with many ***aspects of health***.
 - How important is the ***connectedness*** (or ***estrangement***) of family members on ***health & well-being***?
- Does ***quality*** of ***parent-(teen)child*** relationships ***predict parent-(adult)child*** relationships?
 - Do ***parent-(teen)child*** relationships ***predict later life health & well-being*** of ***each generation***?

Intergenerational Relationships

- ***Caring for Baby Boomer Generation***
 - ***Family members*** are important source of ***caregiving*** for ***elderly*** who are ***ill & disabled***
 - ***Will this care continue*** for those of us in ***Baby Boomer Generation?***
 - ***And, given the incidence of divorce*** among ***Boomers***, will our kids take care of their ***step-parents?***

Intergenerational Mobility

- Growing evidence that ***what parents do & don't do*** for ***young children*** and ***adolescents*** is important for whether ***initial inequality in economic & social status*** and ***health*** is ***perpetuated***.
- Does ***what parents do & don't do*** in a child's ***adult life*** continue to matter?

- Can & do **families help support each other financially**, in **good times** & in **bad times**?
 - This depends on **financial & economic situations** of **each generation** & **nature of ties** between them.
 - It also depends on each generation's **knowledge** of the other generations needs & circumstances.

- **AHPS Parents Phase 2** data is *now available* through a ***Restricted-Use*** Data Contract.
- Apply for the above data, as well as the **AHPS Parents Phase 1** & **Add Health** data, through the **CPC Data Portal**.
- ***Public release*** version of data will be available at later date via ***ICPSR & Dataverse***.
- Data on ***therapeutic measures*** from medications log & from ***family health history*** will be available at later date.
- Possible to add ***contextual data*** in future through ***Add Health ancillary study process***.
- To ***keep informed*** about data releases ***sign up*** for the Add Health list serve by emailing **addhealth@unc.edu**.
