

*National Longitudinal Study of  
Adolescent Health*

*Wave III  
HPV and MGEN Assay Results*

Carolina Population Center  
University of North Carolina at Chapel Hill

September 2004

This research was supported by grant P01-HD31921 from the National Institute of Child Health and Human Development. Further information may be obtained by contacting Add Health Project, Carolina Population Center, 123 West Franklin Street, Room 403, Chapel Hill, NC 27516-2524 ([addhealth@unc.edu](mailto:addhealth@unc.edu)).

*Wave III Add Health HPV and MGEN*

Frequency	Code	Response	Variable Name	Type/Length

### *Wave III Add Health HPV and MGEN*

Frequency	Code	Response	Variable Name	Type/ Length
-----------	------	----------	------------------	-----------------

\* One male was incorrectly flagged for HPV but was correctly assayed for MGEN.

\*\* Even though females were not flagged for the MGEN sample, the design was to assay a random group of those selected for HPV.

**NOTE:** The HPV-MGEN data need special sample weights. These weights are in the file Wave III HPV-MGEN assay weights.
